

Services for medical practitioners

Doctors operate in a complex and demanding area and as a result require professionals that understand their unique pressures and requirements. That's where we come in. At Pilot Partners we have experience working with a wide range of doctors and are committed to providing specialised accounting services to the medical community.

Knowledge and perspective

Our medical services team is led by Angela Stavropoulos and Kristy Baxter. Together, they have more than 40 years of experience helping doctors make smart informed business decisions. Our team strive to find innovative solutions to drive growth and reduce risk to their clients' businesses.

We have worked with healthcare professionals at every stage of their career. We understand that different doctors have different business needs depending if they are a sole practitioner, GP operating as part of a medical centre or a medical specialist.

Services for healthcare professionals

At Pilot, we develop key financial and operational strategies that are aligned with the medical professional's long-term goals including, but not limited to:

- Structuring for asset protection and tax minimisation
- Budgeting and cashflow planning
- Salary sacrifice arrangements to utilise concessions in the medical industry
- Assistance with all accounting and income tax matters
- Strategic financial assistance including planning for expansion, succession and sale
- Project management of financial affairs by co-ordinating appropriately skilled professional advisors to assist you in achieving your financial goals.
